

US DEEP TECH

Immersion Program | New York

May 6 – 10, 2024

Organized by:

Invites:

● **INNSPIRAL, through its ALENA Community, and Latham & Watkins**

Invite you to participate in the first edition of the US Deep Tech Immersive Program. In this opportunity, the program will focus on New York, between May 6th and 10th, 2024.

This program is organized with the focus of creating a bridge to meet and share experiences and knowledge between Chile and the United States and collect best practices that add value to the national ecosystem of corporate innovation.

We invite you to an intense but productive week of work, where you will connect with key players in the Deep Tech innovation scene in New York (Cornell Tech, New Lab, Microsoft AI, Google CVC, Venture Capital Funds, Startups) through an exclusive program of visits, meetings with leading companies, specialized networking to optimize opportunities for collaboration, business and commercial exploration.

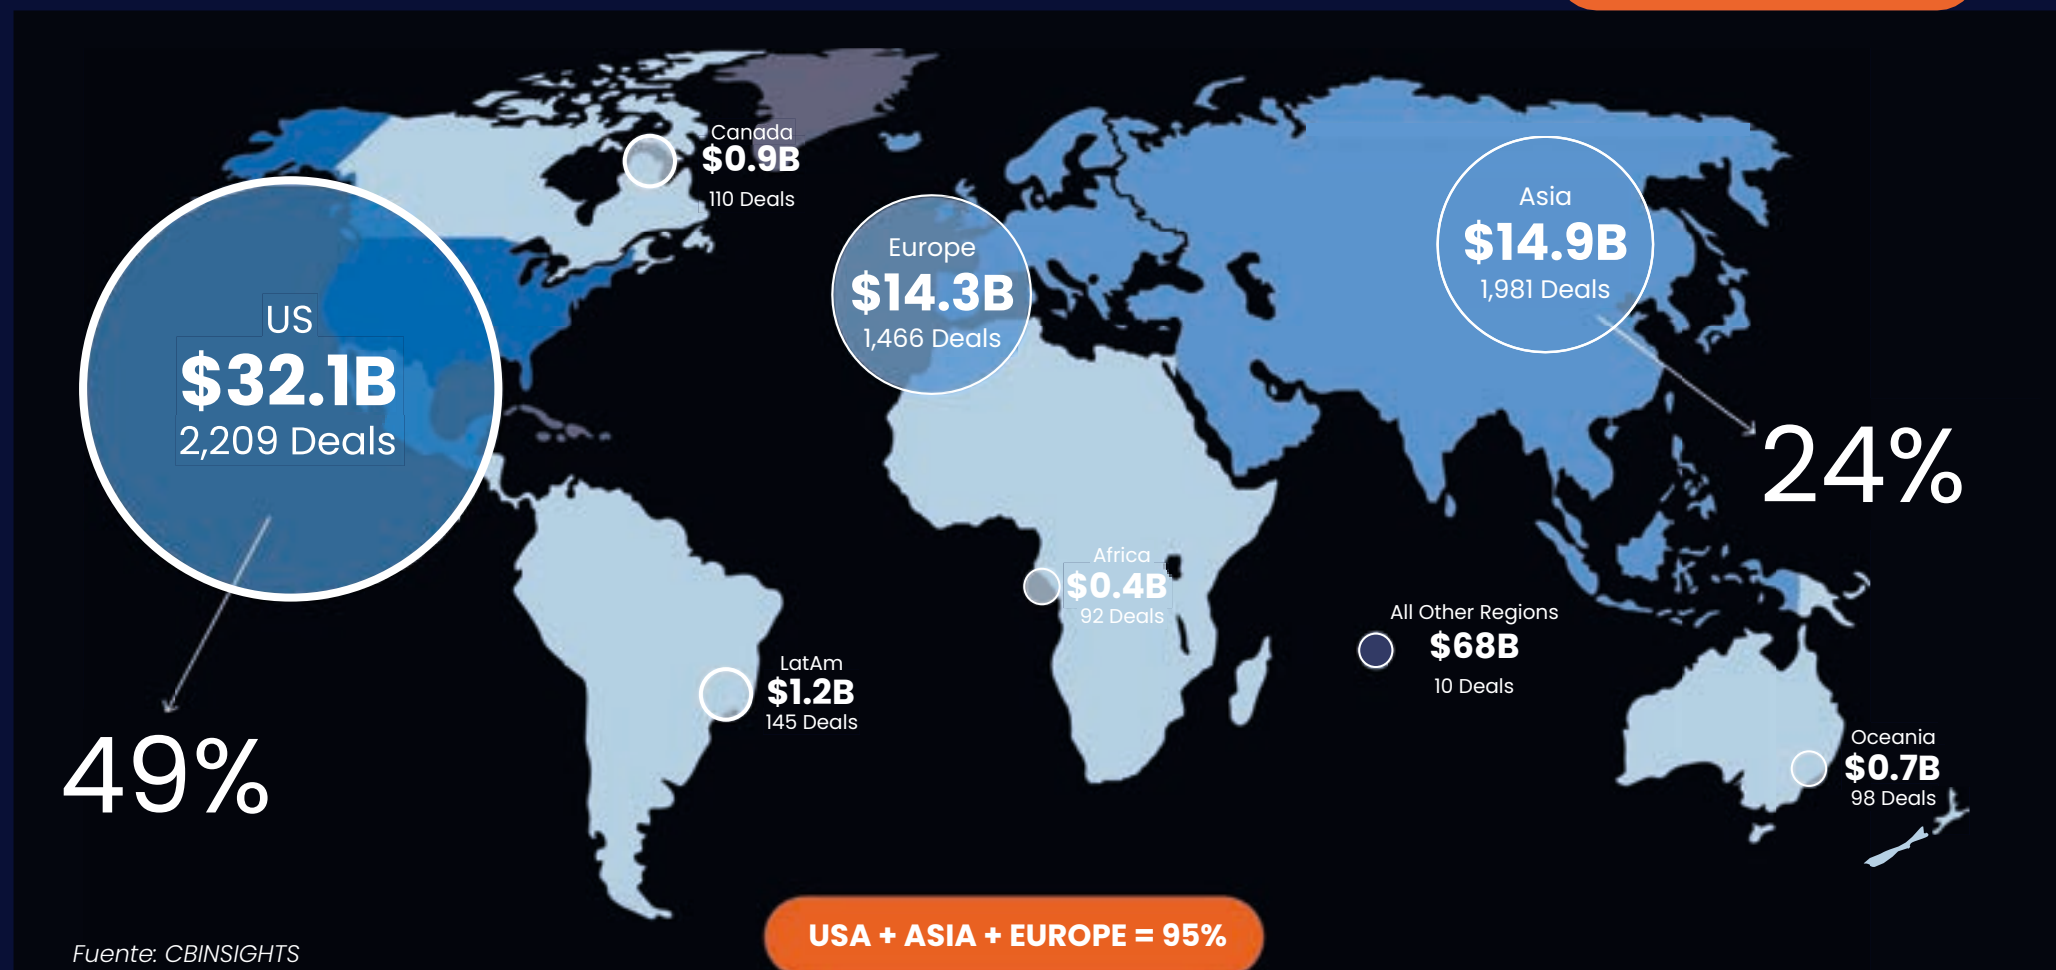

**Don't miss this opportunity
You will be surprised!**

Why New York?

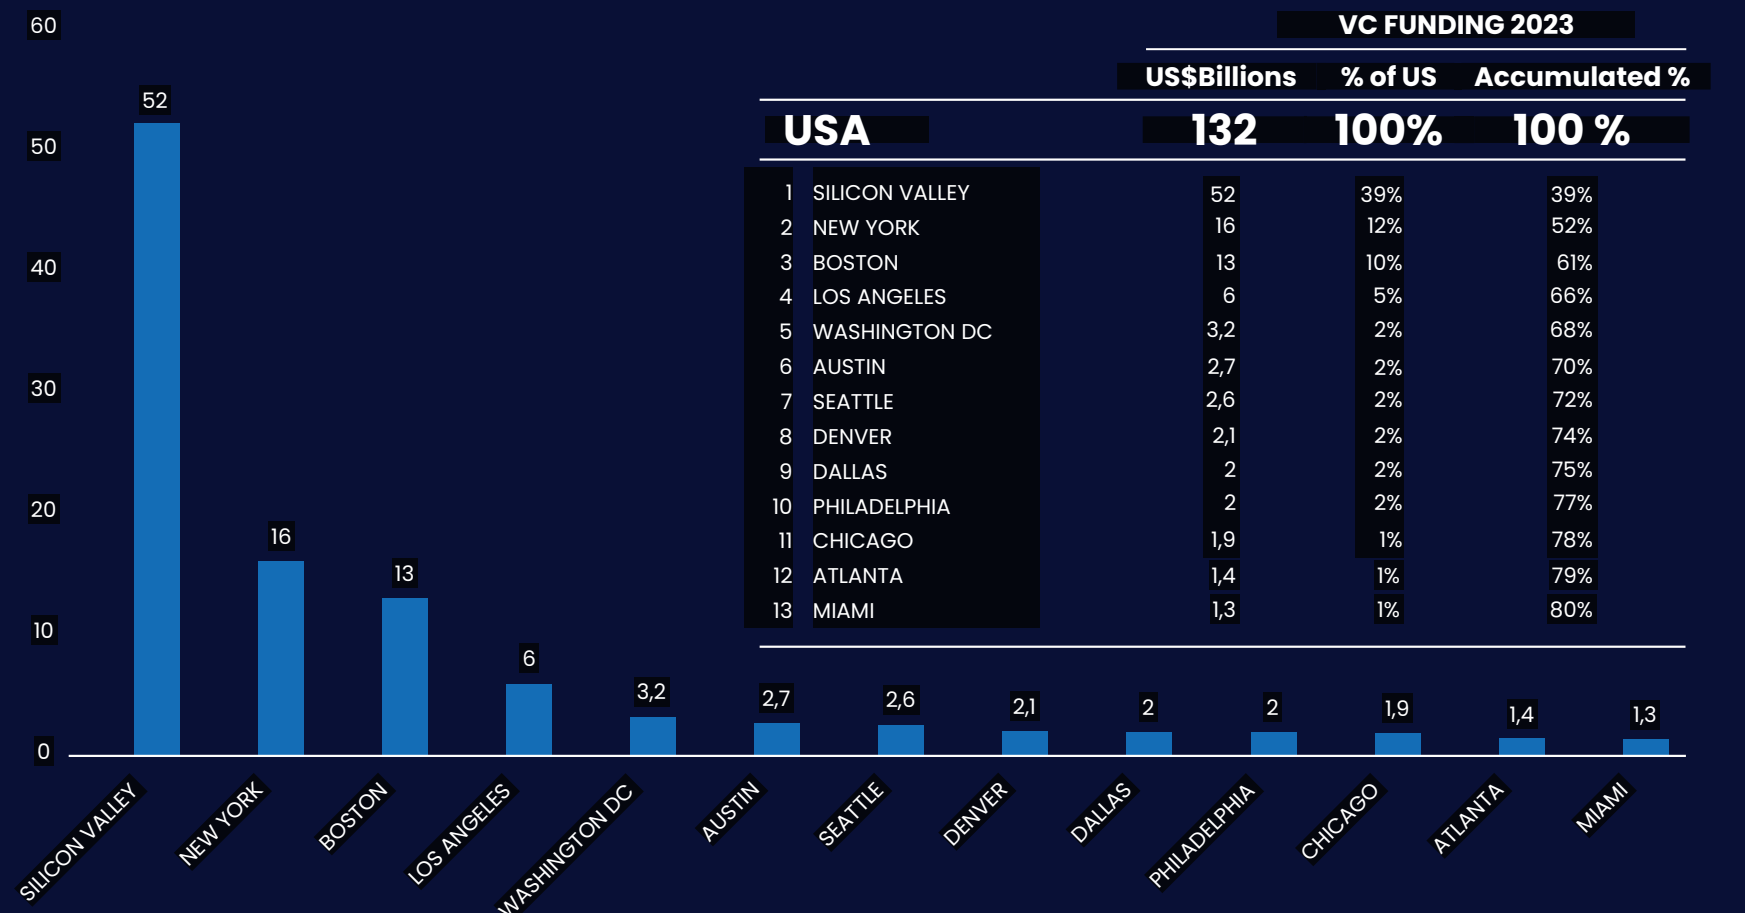

Over the next few years, we will face immense challenges in terms of growth and profitability of our companies. The main opportunities will come from innovating by applying the various new technologies. **US continues to account for 50% of venture capital investments, the source of funding for the world's technology startups. New York is the capital city of US corporate business and the second city in the ranking of its annual VC investments: US \$16 billion.** We will be able to know and learn from the most advanced in the world... But we must learn in the field, talking to the protagonists.

Funding & Deals by global region in Q4'23

GLOBAL TOTAL: US\$51B
